How to use this packet:

Laminate one mouth mat per student. Provide each student with a die (either the paper one included below that you assemble or a real die)...or the tooth numeral cards. Each student will also need a dry erase marker and a cheap toothbrush.

Students roll the die or randomly select a tooth numeral card. Students read the numeral and draw that many black spots (cavities) on the teeth. Then, students use the toothbrush to clean the teeth and get rid of the cavities.
